

CLIVE LLORA

Systems Architect & Vibe Coder

Bataan, Philippines • +63 995 530 0226 • hello@clivellora.com • www.clivellora.com

PROFESSIONAL SUMMARY

Systems Architect and Vibe Coder specializing in rapid, AI-assisted application development and deployment. Bridging advanced AI tools (Claude API, LLMs) with robust engineering (React, PostgreSQL, AWS) to architect scalable, high-performance web ecosystems. Proven track record of leveraging system automation to streamline CI/CD pipelines, integrating complex APIs, and translating business requirements into elegant technical solutions at light speed.

CORE TECHNICAL SKILLS

AI & Vibe Coding:	Prompt Engineering, Claude API, Large Language Models (LLMs), AI Automation Workflows, Rapid Prototyping.
Systems & Cloud:	AWS, Google Cloud Platform (GCP), System Architecture, CI/CD Pipelines, Serverless Edge.
Full-Stack Engine:	Next.js, React.js, Tailwind CSS, Supabase (PostgreSQL), Vercel, GitHub, SQL.

SHIPPED CORE ECOSYSTEMS

- **Curzzo.com | Lead Architect:** Engineered a scalable digital community and recurring subscription ecosystem using Next.js, AWS, and Google Cloud. Utilized Claude for rapid iteration and code generation to drastically accelerate development.
- **Sendnxt.com | Full-Stack Developer:** Developed an automated digital marketing asset generator and workflow platform, integrating robust external APIs, Facebook OAuth, AI chatbots, broadcasts, and automated sequences.
- **Alphabusinessgroup.net | Web Developer:** Rapidly deployed a high-conversion business platform using AI-assisted frontend development and Vercel for seamless global edge delivery.

PROFESSIONAL EXPERIENCE

System Architect • Curzzo Holdings LLC

Jan 2023 – Present

- Architected and deployed the entire digital ecosystem for Curzzo.com, a scalable community and recurring subscription platform, utilizing a modern AI-assisted development stack (Claude, Google Cloud, AWS, React/Next.js).
- Accelerated the development lifecycle by engineering a rapid CI/CD pipeline via GitHub, significantly reducing deployment times for iterative features.
- Designed a secure, high-availability database schema and authentication system using Supabase (PostgreSQL) to handle real-time data synchronization.
- Integrated external revenue APIs, bridging technical architecture with core business operations and subscription management.

Facebook Ads Specialist / Funnel Strategist • Namizentials

Nov 2019 – Jan 2023

- Architected and optimized full digital marketing funnels (ads, landing pages, autoresponders) to maximize Return on Ad Spend (ROAS).
- Managed a high-performing marketing budget exceeding \$1,000,000 while leading a remote team of 5+ employees focused on growth engineering.
- Implemented automated lead generation and conversion systems using advanced data-driven strategies to drive measurable business scaling.

Senior Oracle Database Administrator • TELUS International

Dec 2012 – Dec 2018

- Optimized large-scale enterprise database systems, reducing system downtime by 30% through efficient troubleshooting and architectural refinement.

- Collaborated with cross-functional technical teams to design, secure, and implement user-centric data features and system integrations.

Oracle Database Administrator • Accenture

Jul 2012 – Sep 2014

- Managed and maintained complex enterprise database environments utilizing SQL, ensuring high availability, peak system optimization, and robust data integrity.

EDUCATION

BS in Management Information Systems (MIS) • Graduated 2008
